👤 PROFILE

Strategic and technically skilled Business Systems Analyst with 6+ years of experience driving process automation, system integration, and data quality improvements. Demonstrated expertise in SQL, ETL pipelines, Redshift, Power BI, and Salesforce. Proven ability to lead enterprise-scale projects, develop cross-functional tools, and collaborate with global teams to implement scalable solutions. Recognized for mentoring peers, translating business needs into technical requirements, and continuously finding ways to innovate.

🏢 PROFESSIONAL EXPERIENCE

ThermoFisher Scientific, Sales Operations Analyst II

12/2019 – 07/2025 | Carlsbad, Remote

Involuntary separation due to company-wide layoffs

- Developed and maintained ETL pipelines and advanced SQL queries in Redshift to support business-critical dashboards and opportunity alignment processes
- Built and deployed the Opportunity Cleanup Dashboard in Power BI, aligning with global requirements from the Customer Data Quality team; managed over 2M opportunities representing \$5B+ in funnel value across 2,500 sales reps
- Spearheaded the design and launch of the New User Automation tool in Salesforce, streamlining user provisioning and access management across global teams—cutting manual work by thousands of hours annually
- Collaborated across regions (EMEA, APAC, LATAM, NA) to implement enhancements, manage data governance, and support global analytics operations
- Authored and implemented SOPs, SLAs, and process maps adopted company-wide; delivered documentation and training for initiatives such as the Opportunity Team Member update process and global territory realignment
- Served as Product Owner for the LinkedIn CRM Sync project, coordinating technical delivery with external vendors and internal stakeholders, from sandbox testing to production deployment
- Partnered with the GITx engineering team to model new Redshift tables supporting reporting automation, data lineage tracking, and historical funnel integrity
- Mentored analysts through SQL and Python training sessions and presented at company-wide Analyst Summits on topics including automation, scripting, and scalable reporting practices

Xponential Growth Solutions, Data Analyst and Research Assistant

05/2019 – 06/2021 | San Diego, CA

- Constructed SQL queries for lead sourcing and contact enrichment to optimize client outreach efforts
- Maintained CRM hygiene and built ad hoc reports for business development initiatives

GoSite, Sales Development Representative

01/2019 – 05/2019 | San Diego, CA

- Conducted outbound prospecting and introduced SaaS solutions to small business clients, developing foundational knowledge in B2B sales and client engagement
